PROFESSIONAL SUMMARY

Software Development Engineer with 2.5+ years of experience in full stack development, proficient in building scalable and responsive web applications. Skilled in both front-end and back-end technologies including React, Angular, Node.js, and databases like PostgreSQL and MongoDB. Successfully contributed to 5+ industry-grade projects. Committed to writing clean, modular code and continuously improving system efficiency and reliability.

SKILLS

Frontend Technologies: NEXT.js, React, Angular (14, 16, 17), Redux, RTK, Zustand, RxJS, NGRX, React Query, React Hook Form, Formik, Material UI, Bootstrap 5, Tailwind CSS, Shadcn, Framer Motion, Chart.js, Webpack, ESLint, Prettier

Backend Technologies: Node.js, Express.js, NestJS, REST APIs, PostgreSQL, Docker, SQL, MongoDB, Socket.IO, Zod, Joi, ORMs – Drizzle, Sequelize, AWS (S3, CloudWatch Logger), Google Cloud Platform (Cloud Storage, Cloud Logging, Pub/Sub, Cloud Scheduler)

Tools: VS Code, Sublime Merge, Git, Github, Postman, Fork, Docker

Programming Languages: TypeScript, JavaScript

WORK EXPERIENCE

Software Development Engineer

June 2023 - Current

RemoteState, Noida, Uttar Pradesh, India (201301)

- Contributed to 3 industry-grade projects across various domains, delivered modular, reusable code for more than 30+ workflows with a focus on scalability and performance.
- Developed responsive, user-friendly, and interactive UIs using Angular, React, Tailwind CSS, and Material Design, ensuring a consistent experience across devices.
- Designed and implemented secure and scalable RESTful services using Next.js, Drizzle ORM, and PostgreSQL for a smooth integration between frontend and backend systems.
- Implemented authentication and role-based access control in React applications to enhance data security and user management.
- Integrated digital signature functionality and personalized content generation using SignWell and generative AI APIs. Automated email campaigns and transactional notifications, improving user engagement and operational efficiency.
- Collaborated with customers and cross-functional teams to gather requirements and deliver feature-rich solutions.
- Proficient in Git and GitHub for version control, enabling a collaborative development process.

EDUCATION

IMS Engineering College, Ghaziabad, UP

2019-2023

B.Tech (Computer Science and Engineering) - 71.2%

Sumitra Modern SCH Vijay Laxmi NGR, Sitapur, UP

2017-2018

Intermediate (Class XII) - CBSE - 64.6%

Sumitra Modern SCH Vijay Laxmi NGR, Sitapur, UP

2015-2016

Matriculate (Class X) - CBSE - 72.2%

PROJECTS

- Cab Buddy** ([Github Link](#))
 - Developed a real-time ride-hailing application using React and Tailwind CSS for the front-end, and Node.js, Express, and MongoDB for the backend.
 - Integrated Google Maps APIs for location tracking, route optimization, and ride fare estimation.
 - Implemented real-time communication using WebSockets (Socket.io) for instant ride updates between drivers and users.
 - Designed and implemented role-based authentication and authorization using JWT, allowing secure access for users and captains.
 - Planning to implement Redis for caching and session management to enhance performance and scalability for high traffic and concurrent ride requests.
 - Developed a responsive and user-friendly interface, ensuring seamless ride-booking experiences across devices.

Blogify – Full-Stack Blogging Platform ([Frontend Github Link](#)) ([Backend Github Link](#))

- Developed a fully responsive, interactive blogging platform using React, Redux Toolkit, and Material UI on the frontend, and Node.js, Express, and PostgreSQL on the backend.
- Containerized the PostgreSQL database using Docker for a simplified setup and isolated environment.

- Integrated secure user authentication using JWT and Bcrypt, ensuring data protection with validation on both the frontend (React Hook Form) and backend (Express-Validator).
- Admin role includes privileges to manage users and view all profiles, while the User role allows creating, editing, and managing posts with options for public or private visibility.
- Enabled social interaction features, such as liking and commenting on public posts, with image uploads supported via Multer and Cloudinary.

Book Nexus ([Github Link](#))

- Developed a web-based Library Management System using Angular and Bootstrap for the front-end, and Node.js, Express, and MongoDB for the backend.
- Implemented robust security measures, including modern authentication protocols and session management techniques, to safeguard data integrity and user privacy.
- Admin role includes privileges to add/delete books and manage user profiles.
- User role allows viewing issued books and performing actions on their profiles, such as editing information and changing passwords.
